## **DETAILED ACTION**

### ***Election/Restrictions***

Claims 15-26 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the response filed April 6, 2004.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 27 is rejected under 35 U.S.C. 102(b) as being anticipated by Mlaker (U.S. patent no. 5,746,286). The patent to Mlaker discloses a material transport system comprising a truck (10) and a boom system (12) attached to the truck, the boom system including a first and second boom section (18, 19). The second boom section (19) is substantially formed from composite material, col. 4, lines 36-47. A rotary actuator (32) allows the boom section (19) to rotate relative to the boom section (18), col. 4, lines 50-62.

Art Unit: 3753

***Allowable Subject Matter***

Claims 1-14 are allowed.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Gitt et al is cited for the showing of composite booms for a lift truck used in electrical applications. The patent to Yates is cited for the showing of a carbon fiber reinforced composite pipe.
